PROFESSIONAL SUMMARY

AI-native software engineer with a product mindset and a B.Sc. in Computer Science from Bar-Ilan University. Driven by an eagerness to learn new technologies, patterns, and systems, with a desire to build products end-to-end. Sees AI as a core part of engineering, not a layer on top: embedded in the workflow, the tooling, and the products themselves.

PROJECTS

Recipe Wizard AI *iOS Recipe Extraction App* GitHub

- Built using **Claude Code CLI**: a **Swift** iOS mobile app and a **Node.js + TypeScript** backend backed by **PostgreSQL**, integrated with the **Anthropic API**
- Implemented an iOS share extension: user shares a video → a custom-built recipe extraction AI block parses the video's data and returns a structured recipe (ingredients, steps, cook time)
- Designed full data flow: prompt engineering, Anthropic API response parsing, structured relational database storage, Google OAuth
- Added recipe favoriting, filtering by cuisine, and custom branded in-app icons designed with Nano Banana

Stack: Swift · iOS · Node.js · TypeScript · PostgreSQL · Anthropic API · Google OAuth · Railway

Movie-Match *Real-Time Collaborative Movie Matching App* Live GitHub

- Full-stack web app where users in shared rooms swipe on movies to collaboratively build a shared watchlist
- Real-time bi-directional communication via **Socket.io** (WebSockets) + Express; integrated **TMDB REST API** for live movie data
- Developed end-to-end using **Claude Code CLI** with **MCP integrations** (Playwright MCP for browser automation & testing), leveraging a full AI-native agentic workflow

Stack: React 18 · Node.js · Express · Socket.io · Tailwind CSS · Vite · Vercel · Railway

AI-Ibum *AI-Powered Photo Album Mobile App* GitHub

- Full-stack mobile app for AI-based photo album generation with a facial recognition pipeline using **face-api.js** (TensorFlow.js)

Stack: Flutter · Dart · Node.js · Firebase · TensorFlow.js

Chat Application *Cross-Platform Real-Time Chat* GitHub

- Real-time chat supporting web and Android clients using Express + Node.js backend, React.js frontend, MongoDB, WebSockets

Stack: React.js · Node.js · Express · MongoDB · WebSockets

EDUCATION

B.Sc. Computer Science 2021 – 2025
Bar-Ilan University · GPA: 87.5

High School Diploma 2014 – 2017
Gimnasya Realit · CS & Biology

MILITARY SERVICE

Network Process Support Specialist 2018 – 2020
Mamram Unit Graduate

- Monitored and troubleshot operational systems in computer networks
- Managed combat support systems; 24/7 team-based operational support
- Completed Cyber Warfare course at John Bryce Academy

LANGUAGES

Hebrew: Native · English: Fluent · Spanish: Basic

TECH STACK

Languages: JavaScript, TypeScript, Python, Java, C/C++, Swift, Dart, SQL

Frontend: React 18, React Router, Tailwind CSS, Vite, Framer Motion, Flutter

Backend: Node.js, Express, Socket.io (WebSockets), REST APIs

Databases: MongoDB, MySQL, Firebase (Firestore & Storage)

AI & Tools: Claude Code CLI, Claude Code Skills, Anthropic API, MCP Servers (Playwright MCP), Agentic workflows, TensorFlow.js

DevOps & Infra: Git, GitHub, Vercel, Railway, Linux, Jira

CS Fundamentals: Data Structures & Algorithms, OOP, Design Patterns, Complexity Analysis
